Mr. Michael Holm
Right of Way
Denver Public Works Department
200 W. 3rd Ave.
Denver, CO 80223

Dear Mr. Holm:

The U.S. Environmental Protection Agency (EPA) will be conducting residential cleanups of properties where lead or arsenic concentrations in the yard soil are above levels protective of human health. This is a continuing effort of the remedial action for the VB/I-70 Superfund Site that EPA conducted from 2003 to 2006. Recently EPA contacted the remaining property owners and has obtained permission to perform the soil cleanups on their property.

This letter is a request for a Street Occupancy Permit on behalf of CB&I, the government contractor that will be performing the cleanup work for EPA. EPA is requesting a waiver of the fees associated with the street occupancy permit. CB&I and their subcontractor) will be submitting the application for the permit in the next couple of days and will include a schedule of the properties that will be cleaned up and a traffic control plan. CB&I expects to commence cleanup activities in the next couple of weeks. Should you have any questions concerning this request, please feel free to contact me.

Thank you.

Paula Schmitt diel
